Things to know: 1. Not only that, but I also included calculations for a large number of RoF and Damage that alter the advantages (such as Kill Clip, Rampage, Dual Speed Receiver, Accelerated Coils, etc.). Therefore, the damage of the "À" display is equal to or greater than the actual damage. Fortunately the difference in TTK usually is not very large, because low damage means high RoF.The HP Resilience values listed are my best estimates, rounded to whole numbers. For weapons such as scouts and handguns that cause high bullet damage, this usually has little effect. However, for weapons that fire a lot with low damage, this can mean they take one more shot or two to kill. The Destiny Weapon 2 spreadsheet shows an estimate of the time it takes to kill based on the weapon's archetype and the resilience of your enemies.ÀÀ in addition to the time of PVP to kill calculations for optimal accuracy and body shots.À Before checking the spreadsheet, there are some things you need to know about Time To Kill or TTK for short. I got these by firing a player at all levels of resilience with a sniper body shot, and then HC head shots at various stages of drop damage. Combining the time between the projectiles and the bursting damage done, TTK "À" is one of the best indicators of how lethal a weapon is.À The reason why I mentioned TTK that "À" is one of the best indicators instead of the "À" because only the TTK value can be deceptive. The only people I've seen using this weapon in PvP are YouTubers trying to embarrass other players.À Destiny 2Conclusion Weapon SpreadsheetSeasoned PvP players have the knowledge and experience of the current values of PvP meta and TTK. You should also consider the ease duse weapon to judge how good a weapon is. 6.3.
